* How we enjoy the essential oils even more. A look at a extra income stream

+ As we meander through any and all of these topics we hope that the enrichment of the essential oils reaches a point where they engender a trust and enthusiasm to learn and explore from where you are and what you trust your Self to present to you in your sessions.

+ Understanding that the clients needs and yours for a specific oil can align.

+ Detachment from what is asked in the technical, medical side of business as it refers to the requirements of your practice.

+ The deepest place reiterated

With Gratitude for your study and your service,
